Career Objective

To find a position as a front-end developer, where I can be creative and grow as a web developer.

FrontEnd Engineering experience

Easyliving

Helped create an application that was built using the backbone.js framework. The application helps tenants post rooms, and it gives them the ability to find roommates as well. The potential roommates have the ability to sign contracts online, and pay the rent and down payments online. Multiple APIs such as stripe, hellosign, google maps, youtube, and discus were used to make this work.

OITNB

An elegant restaurant website, that uses vanilla JavaScript and Ajax to pull down data from an external RESTful API. Mustache.js was used for the front end templating of the application.

Instagram mock-up

I created an instagram mockup in Backbone.js that allowed users to edit, delete, and post images on the interface just like Instagram. Parse was used as remote database for all the data as well.

All my work can be found on my personal github <https://github.com/noemiostorga>

Education

Iron Yard

January 2016

- Front-End Developer Graduate

West Career and Technical Academy

June 2014

- Received High School Diploma

Skills

Technical Skills

- HTML5
- CSS3, Sass, Skeleton & Bootstrap
- JavaScript, JQuery, AJAX, Mustache.js
- React & Backbone
- Parse (as a backend service)
- Git & Github

Non-Technical Skills

- Bilingual (fluent Spanish & English)
