Career Objective

I'm currently programming with Angular as a Front-End developer. My Front-End knowledge comes from the front-end engineering program I graduated from at the Iron Yard. I'm looking to work for a company that will help with my creative and technical growth.

Work Experience

Web Developer

April - August 2016

Scooterbay Publishing Inc.

- Created responsive html templates using PhPStorm for customers who have subscribed to our newsletter and to those who receive daily emails from the company.

Front-End Developer

November - December 2016

Margolis-Media

- Created responsive websites for small businesses using Webflow and custom code such as HTML, CSS, and Javascript.

Front-End Engineering Experience

All my work can be found on my personal github <https://github.com/noemiostorga>. I have worked closely with other developers which gave me experience on how to manage, work, and merge code onto a project.

Easyliving

Created an application that was built using the backbone.js framework. The application helps tenants post rooms and it gives them the ability to find roommates as well. The potential roommates have the ability to sign contracts online, and pay the rent and down payments online. Multiple APIs such as stripe, hellosign, google maps, youtube, and discus were used to make this work.

OITNB

An elegant restaurant website, that uses vanilla JavaScript and Ajax to pull down data from an external RESTful API. Mustache.js was used for the front end templating of the application.

Education

Iron Yard

January 2016

- Front-End Developer Graduate

The Front End Engineering course focuses on creating experiences in the web browser that users see and interact with. The discipline covers a broad area, from web design principles to complex JavaScript applications that manage data.

West Career and Technical Academy

June 2014

- Received High School Diploma

The mission of WCTA is to compete successfully in the 21st Century by providing a college preparatory education that utilizes project-based learning, real-world learning applications, and innovative technology.

Skills

- | | |
|---|--|
| - HTML5 | - Parse (as a backend service) |
| - CSS3, Sass, Skeleton & Bootstrap | - Git & Github |
| - JavaScript, JQuery, AJAX, Mustache.js | - Angular |
| - React & Backbone | -Bilingual (fluent in Spanish & English) |
